ACKNOWLEDGEMENTS

The production of this report would not have been possible without the concerted effort of the police departments and sheriff's offices throughout the State of Wyoming who report accurately and regularly to the Wyoming Uniform Crime Reporting Program Section of the Center for Criminal Justice Research. The significance of their contribution is demonstrated in this report, which presents detailed information on the extent and fluctuation of crime in Wyoming.

INTRODUCTION

This annual report of Crime in Wyoming, 1982, contains law enforcement data compiled from Uniform Crime Reporting (UCR) records. These records were designed to collect pertinent standardized law enforcement data at the city and county levels and were prepared in compliance with the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting Program Standards and Definitions.

Local law enforcement agencies prepare UCR forms containing offense, clearance, arrest and supplemental information and submit the reports on a monthly basis to the State UCR Section of the Center for Criminal Justice Research, Division of Criminal Identification, Office of the Attorney General.[1] The UCR Section then verifies the reports, automates the data for later analysis at the State level and then forwards the reports to the FBI for use in compilation and analysis of national crime statistics.

It is important to note certain constraints which should be exercised in interpreting and drawing conclusions from the data contained herein. Although Wyoming has yet to achieve 100 percent reporting, 69 individual agencies currently report and these agencies serve jurisdictions representing 96.9 percent of the State's population.[2] Twenty-two of these agencies are sheriff's offices and forty-seven are police departments.

---

[1]See W.S. 1977 §7-1-122 for legislation mandating the reporting of crime information to the Attorney General's Office.

[2]The population figures used in preparing this report are estimates calculated from population data from the U.S. Department of Commerce - Bureau of the Census and the Division of Research and Statistics - Department of Administration and Fiscal Control - State of Wyoming.

Additionally, there are other inherent limitations in the current crime reporting practices. Of primary importance is the question of how much crime is being reported. Law enforcement agencies are capable only of reporting crimes known to them. In many instances, citizens do not report crimes directly to these agencies but may report them to the prosecuting authorities. A considerable volume of crime is not reported to law enforcement agencies because the victims may consider the offenses against them to be of little consequence, they may believe there is nothing the police can do about them, or they may fear retaliation from the offender. Consequently, information concerning some offenses is never entered into the present statistical reporting system.

Further, only arrest data is submitted on Part II Offenses.[3] Therefore, current UCR statistics do not necessarily measure the true incidence of crimes or the actual economic loss incurred by victims.

Crimes and arrests should not be compared on a one-to-one basis; a crime is an event and an arrest relates to an individual. For example, several crimes may be solved by one arrest or many persons can be arrested for committing one crime.

The information presented in this report portrays the most accurate and realistic assessment currently available of the crime situation in Wyoming. UCR statistics are not designed as an indicator of agency activity for use in direct comparison, but rather pertain to a specific geographic area. A causal relationship exists between crime and many socio-economic factors. However, reported crime activity is a measurable quantity and, as such, should be used to present the clearest possible picture of the dimensions, fluctuations and impact of crime in Wyoming.

[3]See page 107 for definitions.

CRIME INDEX

Volume

During the period of January through December, 1982, 5.8 percent fewer Crime Index Offenses were reported or known to the police than in the previous year.[4] During 1982, 23,565 Crime Index Offenses came to the attention of law enforcement officials compared to 24,755 in 1981.

The offenses which make up the Crime Index are all serious, either by their very nature or because of the frequency with which they occur, and present a common enforcement problem to all law enforcement agencies. Crimes within this Index are categorized as Violent Crimes (which include murder, forcible rape, robbery, and aggravated assault) or Property Crimes (which include burglary, larceny-theft and motor vehicle theft). By congressional mandate, Arson was added as the eighth Crime Index Offense in late 1978. Although Arson has been reclassified to an Index Offense, data collection is separate and will be presented independently of other offense data in this report.

Violent Crimes

Violent crimes involve the element of personal confrontation between the perpetrator and the victim, and entail the use or threat of force or violence. By their very nature, violent crimes are considered more serious than property crimes. The violent crimes, as a group, fell 30.1 percent during 1982.

---

[4]This figure was calculated by making a comparison on an agency-by-agency basis in which those agencies where reports are on file for the same months for 1981 and 1982 were compared. When interpreting PERCENT CHANGE figures throughout this report, caution must be used since a slight increase or decrease in the number of actual reported offenses may dictate a large percent change due to the relatively small volume of offenses.

Murder was the only Index Offense to experience an increase in 1982, climbing 38.5 percent when compared to 1981. This increase, however, was offset by a substantial reduction in the number of reported aggravated assaults, which fell by 34.9 percent. This drop in aggravated assaults was largely responsible for the overall decrease noted in the violent crime category. Both forcible rape and robbery also noted declines in 1982, with rape falling 19.6 percent and robbery off 15.4 percent when compared to 1981 figures. The violent offenses as a group made up 6.2 percent of the 1982 total Crime Index, compared to 8.2 percent in 1981.

Property Crimes

Property crimes do not involve the use or threat of violence, but they do entail property taken from one by another. Collectively, the number of property crimes noted a moderate decrease, falling 3.6 percent from the 1981 figures. Motor vehicle thefts led the decline of property crimes, dropping 13.7 percent in 1982. Burglaries were off by 8.1 percent in 1982, and larcenies, which make up the bulk of the property crime category, fell slightly by 1.5 percent. Property crimes accounted for 93.8 percent of the total Crime Index for 1982, compared to 91.8 percent in 1981.

Crime Rate

During 1982, the crime rate per 10,000 inhabitants in Wyoming for all Index Offenses was 494.3, which represents a decrease of 8.9 percent from the 1981 rate of 542.4[5]. The violent crime rate for 1982 was 30.4 per 10,000 inhabitants, a 30.0 percent decline from the 1981 recorded rate of 43.4. The property crime rate experienced a more moderate decline in 1982, falling to 463.9 per 10,000 from the 1981 rate of 499.0, a decline of 7.0 percent.

---

[5]Since the 1981 population base used in calculating the current estimated population was revised, (See Wyoming Population and Employment Forecast Report, 5th Edition, Division of Research and Statistics, DAFC, State of Wyoming), the crime rate reported in 1981 of 544.1 was adjusted to 542.4 per 10,000 population. For revised 1981 offense and agency crime rates see page 103.

Clearances

For Uniform Crime Reporting purposes, an Index Offense is cleared when 1) a law enforcement agency has identified the offender, 2) there is enough evidence to charge him, and 3) he is actually taken into custody. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one offense. Clearances are also recorded in exceptional circumstances when some element beyond the control of the law enforcement agency precludes formal charges being brought against the offender.

Of the 23,565 offenses reported to the police during 1982, 5,089 were cleared for an overall clearance rate of 21.6 percent. Violent crimes evidenced a substantially higher clearance rate than property crimes, with 57.1 percent of the violent crimes resulting in a clearance, while only 19.2 percent of the property crimes were cleared.

Clearances involving only persons under eighteen years of age accounted for 24.5 percent of the total clearances reported in 1982. During this reporting period 1,245 clearances involving only persons under eighteen years of age were reported of which 7.4 percent or 62 were for violent crimes and the remaining 92.6 percent or 1,183 were property crime clearances. The main juvenile involvement was within the larceny-theft classification, which accounted for 72.0 percent of all juvenile clearances.

The relatively high clearance rate for violent crimes compared to property crimes is due to several factors including the volume difference between the two groups. During 1982, there were over fifteen times as many property crimes reported to law enforcement agencies than violent crimes. Also, because of their serious nature, police investigation of violent crime is usually more

intensive. The element of confrontation between the victim and the offender may also contribute to the higher clearance rate for violent crimes.

Stolen Property Value

The value of property stolen incidental to Crime Index Offenses in Wyoming during 1982 totaled $15,131,638, compared to $15,902,364 stolen during 1981. This represents a decrease of 4.8 percent. Law enforcement officials were successful in recovering 45.5 percent of the loss, or $6,880,432 resulting in a net loss of $8,251,206.

Arson

A decrease of 18.1 percent was noted in the number of arson offenses reported or known to Wyoming law enforcement agencies during 1982. Arson offenses totaled 114 in 1982 compared to 139 during 1981. Of the 114 reported arsons during this period, 38 or 33.3 percent were cleared, compared to 33 clearances, or 23.7 percent during 1981. Property damage totaled 1,332,761, which is 53.6 percent less than the $2,870,950 estimated property damage during 1981.

Seasonal Fluctuations

The monthly totals for reported Crime Index Offenses for 1982 and 1981 illustrate that the summer months generally are the high crime months with July the peak month for both years. Quarterly, the period of July through September, during 1982 and 1981 had the highest volume of reported Index Offenses. Semi-annually, the first six months of both comparative years recorded fewer reported offenses than the last six months of each year.

WYOMING CRIME INDEX
1982

	ACTUAL OFFENSES	OFFENSES CLEARED(%)	STOLEN PROPERTY	PERCENT CHANGE	RATE PER 10,000 POPULATION

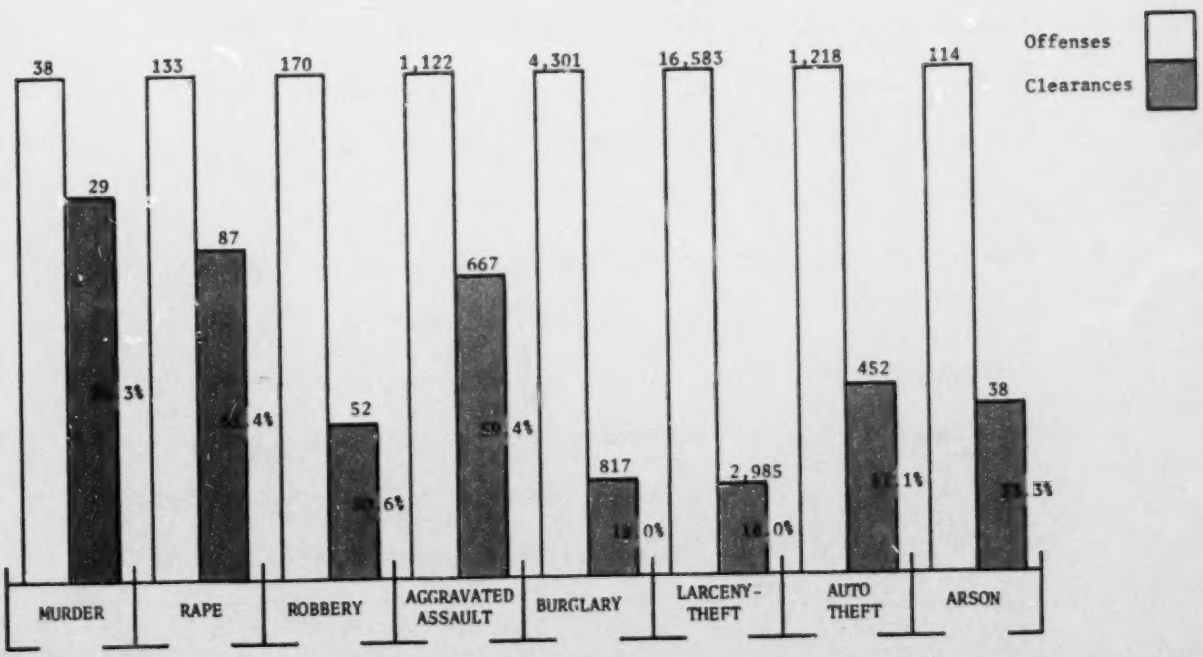
[6]The rape rate is per 10,000 females.

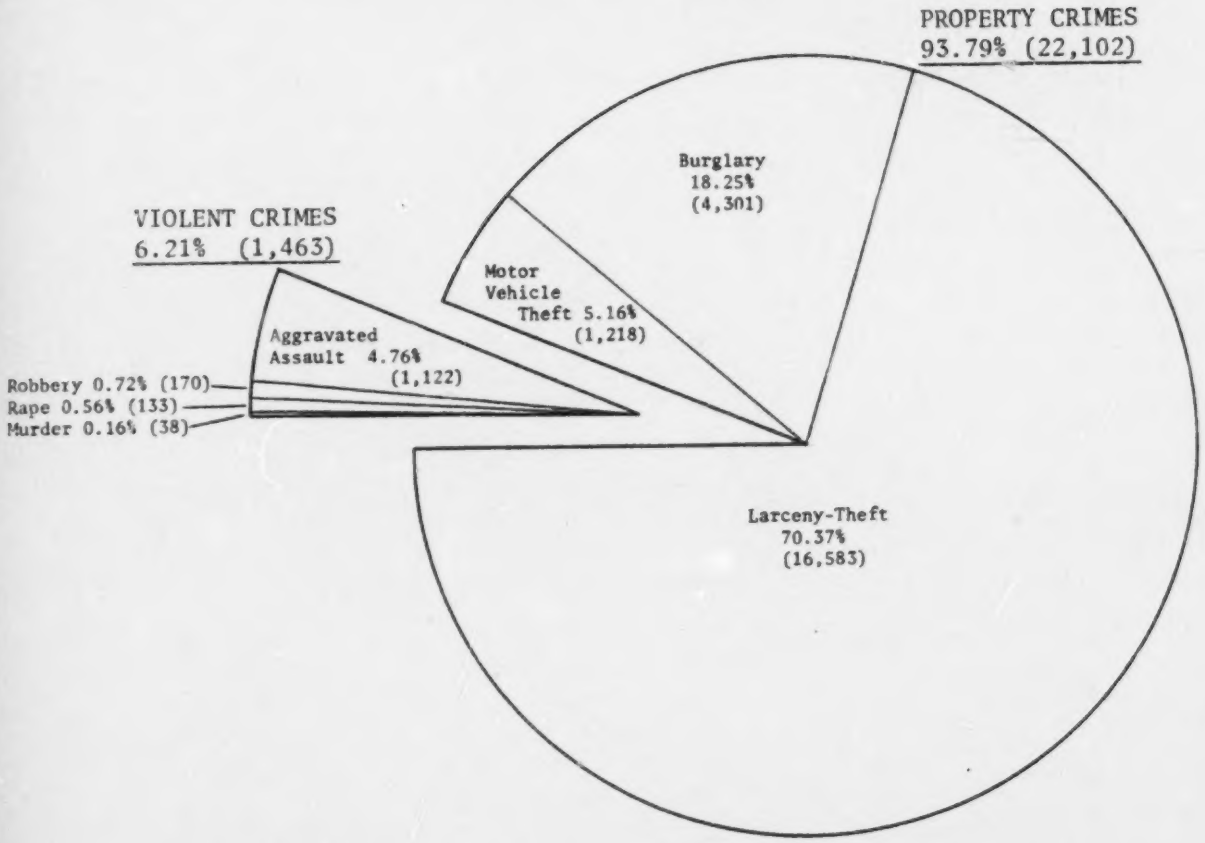
[7]This figure represents the estimated value of property damage.

CLEARANCE RATES FOR INDEX OFFENSES
1982



1982 DISTRIBUTION OF INDEX OFFENSES

Total Offenses=23,565



During 1982 a total of 23,565 Index Offenses were reported or known to Wyoming law enforcement authorities. The vast majority of these offenses, 22,102 or 93.79 percent, were property crimes. Larceny-theft alone accounted for 70.37 percent of the total Crime Index. Violent crimes, as a group, were responsible for only 6.21 percent of the Crime Index total.

While violent crime experienced a significant drop of 30.1 percent in 1982, the Crime Index as a whole declined only 5.8 percent. This is due to the more moderate decreases noted for property crimes, which account for the bulk of the Index Offenses. Larceny-theft declined only 1.5 percent in 1982, and burglary fell 8.1 percent. Given the larger volume of property crimes in the Index, large scale shifts in violent crime may be moderated by more subtle changes in the property crimes.

CRIMINAL HOMICIDE

Murder

Murder and non-negligent manslaughter are defined for the Uniform Crime Reporting Program as the willful (non-negligent) killing of one human being by another. One offense is counted for each person willfully killed by another. As a general rule, any death due to a fight, argument, quarrel, assault, or the commission of a crime is included. Attempted murders and assaults to murder are scored as aggravated assaults and not as murder. Also excluded are suicides, accidental deaths, and justifiable homicides.

During the period January through December, 1982, 38 murders were reported or known to the police, compared to 26 murders in 1981. A comparison on an agency-by-agency basis reflects a 38.5 percent increase in the number of murders known to the police compared to 1981. Murder has the lowest crime rate of any of the Index Offenses and evidenced a moderate increase in 1982 at 0.7 offenses per 10,000 Wyoming inhabitants, compared to 0.6 in 1981. Of the 38 murders during 1982, 29 offenses have been reported as cleared for a clearance rate of 76.3 percent, compared to 96.2 percent or 25 clearances during 1981. The value of property stolen incidental to the 38 offenses of murder occurring in 1982 totaled $4,300. This compares to $13,560 stolen in 1981. Offenses of murder account for 0.16 percent of the total Index Offenses reported or known to the police during 1982 compared to 0.10 percent in 1981.

In all cases of murder reported in the Uniform Crime Reporting Program, a supplemental homicide report is submitted by the participating law enforcement agency. This report provides pertinent information consisting of a situation code; the age, sex and race of victims and offenders where known;

the weapon used; the relationship of the victim to the offender; and any circumstances or motives which led to the commission of the crime.

Presented in the following tables is a summary of offense, victim and offender information on the homicides reported during 1982 from these reports.

MANSLAUGHTER BY NEGLIGENCE

Manslaughter by negligence is defined as the killing of another person through gross negligence. Generally, deaths caused by the gross negligence of another are counted. One offense is scored for each person killed. The death of a person caused by his own negligence is not counted as an offense. Also excluded are traffic fatalities. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

During 1982, one incident of manslaughter by negligence was reported. No manslaughters by negligence were reported in 1981.

The victim, a 25 year old white male, was killed by a friend, a 16 year old white male, with a rifle in May. The offender and the victim had been drinking. At one point the offender intended to scare the victim by firing a shot over the head of his friend while he was sitting next to the fire. At the same time the shot was fired, the victim stood up causing the bullet to enter the back of his head.

FORCIBLE RAPE

Forcible Rape is defined in the Uniform Crime Reporting Program as the carnal knowledge of a female forcibly and against her will. Included in this offense category are attempts or assaults to commit rape. Statutory rape (without force) and other sex offenses are not included in this category. One offense is counted for each female raped or upon whom an assault or attempt has been committed.

During 1982, 133 forcible rapes were reported or known to the police as compared to 164 in 1981. A comparison on an agency-by-agency basis indicates a 19.6 percent decrease in the volume of rapes in 1982 when compared to 1981. Of the 133 forcible rapes reported during 1982, 87 have been cleared for a clearance rate of 65.4 percent, compared to 99 clearances or 60.4 percent in 1981. In 1982, property loss in the rape category was reported at $336, compared to $1,424 in 1981. Offenses of forcible rape and attempts to commit forcible rape account for 0.56 percent of the total Index Offenses reported or known to the police during 1982, compared to 0.66 percent in 1981.

By Uniform Crime Reporting definitions, the victims of forcible rape are always female. Given this fact, a more accurate account of the victimization rate for this offense requires excluding males from the population base figure. For 1982, it has been estimated that 48.7 percent of the State's population is female, or 228,271 persons, which represents the covered female population for calculating crime rates. This represents a rate of 5.7 forcible or attempted rapes per 10,000 females. It is important to note that victimization studies in recent years indicate that offenses of rape are not equally distributed throughout the female population; very young and very old females are victimized much less frequently than the young to middle-aged females. With this fact in mind, a separate victimization rate was calculated for females

between the ages of 14 and 64 years. The victimization rate for this sub-population of females is substantially greater, rising to 8.5 victimizations per 10,000 females.

Though the UCR Program does not collect age data, it is believed that the exclusion of females below 14 and above 64 years of age will have no more than a negligible effect on the validity of these figures.

	TOTAL NUMBER OF PERSONS	RAPES KNOWN TO POLICE[11]	RATE PER 10,000	RATIO OF RAPES TO WOMEN
Wyoming Population[10]	468,729	133	2.8	---
All Females[12]	228,271	133	5.7	1:1,770
Females 14 to 64[13]	150,931	133	8.5	1:1,170

---

[10]The crime rate for the entire population, men and women, is being provided for comparison with national statistics only.

[11]In order to calculate crime rates, agencies with less than twelve months on file during 1982 were subtracted from offense and population totals. The number of offenses used in calculating crime rates in the forcible rape classification is 129.

[12]The percentage of the State's population that is female and that portion from 14 to 64 is based on data compiled by the Division of Research and Statistics, Department of Administration and Fiscal Control, State of Wyoming, Wyoming Population and Employment Forecast, 5th Edition, July, 1982.

[13]Readers are referred to Nicolette Parisi, Michael J. Hindelang, Michael R. Gottfredson and Timothy J. Flanagan, eds., Sourcebook of Criminal Justice Statistics-1978 (Washington, D.C.; U.S. Government Printing Office, 1979) pp 367-383, for victimization rates for females of different age categories. See also Albert J. Reiss, "Problems in the Documentation of Crime" in Anthony L. Guenther, Criminal Behavior and Social Systems (Chicago: Rand McNally, 1976) pp 111-130, for a discussion supporting the reporting of victim-specific crime rates.

ROBBERY

Robbery is defined as the taking or attempting to take anything of value from the care, custody or control of a person or persons by force or threat of force or violence and/or putting the victim in fear. In any instance of robbery, one offense is counted for each distinct operation. The number of persons robbed or those present at the robbery is disregarded. Additionally, the number of persons committing the crime has no reflection on the number of offenses being counted.

During the period of January through December, 1982, 170 robberies came to the attention of law enforcement officials, compared to 201 robberies in 1981. An agency-by-agency comparison with the same months for the two years indicates a 15.4 percent decrease in the number of robberies reported in 1982 from the previous year. As would be expected, with fewer offenses and an increase in population, the rate also decreased, from 4.4 offenses per 10,000 population in 1981 to 3.6 per 10,000 in 1982. This represents a decline of 18.2 percent. Of the 170 robberies reported in 1982, 52 clearances have been recorded for a clearance rate of 30.6 percent. This compares to 63 clearances or 31.3 percent in 1981. The value of property stolen incidental to robberies in 1982 totaled $213,746, 62.5 percent less than the 1981 total of $570,248. Robbery offenses account for 0.72 percent of the total Index Offenses reported in 1982, this compares to 0.81 percent noted in 1981.

ASSAULT

Aggravated Assault

Aggravated assault is defined as an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could, and probably would result in serious personal injury were the crime successfully completed. One offense is scored for each person assaulted or upon whom an attempt to assault has been made.

During the period, January through December, 1982, 1,122 offenses of aggravated assault came to the attention of the police, compared to 1,646 offenses in 1981. An agency-by-agency comparison with the same months for the two years reflects a 34.0 percent decrease in the number of reported offenses during 1982 when compared with 1981. A crime rate of 23.3 aggravated assaults per 10,000 persons was witnessed in 1982, compared to 34.9 per 10,000 in 1981, a drop of 33.2 percent. Of the 1,122 aggravated assaults reported in 1982, 667 have been cleared for a clearance rate of 59.4 percent. This compares to 799 clearances recorded in 1981 for a clearance rate of 48.5 percent. Offenses of aggravated assault account for 4.8 percent of the total Index Offenses reported during 1982 compared to 6.6 percent in 1981.

Simple Assault

This category is for all assaults which did not involve the use of a firearm, knife or cutting instrument, or other dangerous weapon and there was no serious or aggravated injury to the victim. Simple assault is a Part II Offense, not a Crime Index Offense, but is collected under the assault category for quality control and for the purpose of reviewing total assaultive violence.

During the period of January through December, 1982, 1,843 simple assaults were reported or known to the police, compared to 1,476 offenses in 1981. An agency-by-agency comparison with the same months for the two years reflects a 22.9 percent increase in the number of simple assaults reported in 1982. The crime rate also noted a rise in 1982, climbing from 32.7 per 10,000 persons in 1981 to 39.1 offenses per 10,000 persons in 1982, an increase of 19.6 percent. Of the 1,843 simple assaults reported during 1982, 1,136 have been cleared, for a clearance rate of 61.6 percent. This compares to a clearance rate of 62.0 percent, or 915 clearances of simple assault in 1981. Simple assaults accounted for 62.2 percent of the total offenses in the assault category during 1982, compared to 47.3 percent for 1981.

LAW ENFORCEMENT OFFICERS ASSAULTED

Included are all assaults on officers who have full arrest powers in which the officer sustained serious injury or in which a weapon was used which could have caused serious injury or death. Also counted are those sworn officers who were not injured, provided the assault was more than mere verbal abuse or minor resistance to an arrest. When an officer is assaulted in the line of duty, even though in an "off duty" status, where he is performing official law enforcement duties, an assault is counted.

An average rate of 11 of every 100 law enforcement officers statewide were assaulted in 1982 as compared to a rate of 13 per 100 officers in 1981. During 1982, 144 assaults on law enforcement officers were reported compared to 162 assaults in 1981 for a decrease of 11.2 percent. Of the 144 assaults during 1982, 98.6 percent or 142 of these assaults have been cleared as compared to 161 clearances or 99.4 percent in 1981. Injuries were sustained in 28 of the 144 assaults on officers during 1982 as compared to 46 in 1981 which represents a 39.1 percent decrease in the number of injurious assaults.

In all cases of assaults on law enforcement officers reported in the Uniform Crime Reporting Program, a supplemental report is submitted by the participating law enforcement agency. This report provides detailed information regarding a particular assault on a law enforcement officer. Such supplemental reports categorize the type of activity, type of weapon, type of assignment, assaults cleared, whether the assault resulted in injury by weapon category and the time of occurrence.

Presented in the following tables is a summary of the January through December, 1982, data from these supplemental reports.

BURGLARY

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry. One offense is counted for each distinct operation.

During the period of January through December, 1982, 4,301 burglaries were reported or known to the police compared to 4,639 burglaries during 1981. An agency-by-agency comparison with the same months on file for the two years reflects an 8.1 percent decrease in the number of reported offenses in 1982 when compared with 1981. The 1982 crime rate for burglary was also down, from 102.0 burglaries per 10,000 population in 1981 to 89.5 offenses per 10,000 persons in 1982. This represents a decrease in the crime rate of 12.3 percent. Of the 4,301 burglaries during 1982, 817 have been cleared for a clearance rate of 19.0 percent. This compares to a clearance rate of 20.1 percent or 931 clearances of burglaries in 1981. The value of property stolen incidental to burglaries in 1982 totalled $3,612,109 compared to $3,791,530 in 1981. This represents a decrease of 4.7 percent, or $179,421 less than that stolen during 1981. Of all burglaries during 1982, 57.6 percent involved residences compared to 55.6 percent in 1981. Offenses of burglary account for 18.3 percent of the total Index Offenses reported or known to the police during 1982, compared to 18.7 percent for 1981.

LARCENY - THEFT

Larceny-theft is defined as the unlawful taking, carrying, leading or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle theft, etc., in which no use of force, violence or fraud occurs. In the Uniform Crime Reporting Program this crime category does not include embezzlement, "con" games, forgery or worthless checks. Motor vehicle theft is also excluded from this category for crime reporting purposes inasmuch as it is a separate Crime Index Offense. One offense is counted for each distinct operation.

During the period of January through December, 1982, a total of 16,583 larcenies were reported or known to the police, compared to 16,675 larcenies during the previous year. An agency-by-agency comparison with the same months for the two years reflects a 1.5 percent decrease in the number of reported larcenies from the 1981 figure. The larceny crime rate of 349.3 per 10,000 persons for 1982 was down 4.6 percent from the 1981 crime rate of 366.2 larcenies per 10,000 population. Of the 16,583 larcenies reported during 1982, 2,985 have been cleared for a clearance rate of 18.0 percent. This compares to 16.9 percent or 2,817 clearances of larceny during 1981. Of the total larcenies reported during 1982, 33.7 percent were under $50 in value, 34.6 percent were $50 to $200 in value, and 31.7 percent were over $200 in value. Larceny offenses accounted for 70.4 percent of the total Index Offenses reported to the police during 1982, compared to 67.4 percent during 1981.

MOTOR VEHICLE THEFT

In Uniform Crime Reporting, motor vehicle theft is defined as the theft or attempted theft of a motor vehicle. This definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access. Also excluded are thefts of farm equipment, construction equipment, airplanes and motor boats, the theft of which is scored as a larceny. One offense is counted for each vehicle stolen or where an attempt is made to steal a motor vehicle.

During the period of January through December, 1982, a total of 1,218 motor vehicle thefts were reported or known to the police as compared to 1,404 motor vehicle thefts in 1981. An agency-by-agency comparison with the same months for the two years reflects a 13.7 percent decrease in number of reported offenses during 1982 when compared with 1981. Of the 1,218 thefts of motor vehicles reported in 1982, 452 offenses have been cleared for a clearance rate of 37.1 percent. This compares to 489 clearances or 34.8 percent in 1981. The value of motor vehicles stolen in 1982, totalled $5,166,018, down 7.2 percent from the $5,567,018 reported stolen in 1981.

Offenses of motor vehicle theft accounted for 5.2 percent of the total reported Index Offenses during 1982 and accounted for 34.1 percent of the total value of stolen property. This compares with 5.7 percent and 35.0 percent, in each of the respective categories for 1981.

The motor vehicle theft crime rate of 25.1 offenses per 10,000 population in 1982 was down from the 30.8 per 10,000 in 1981. This represents a decrease of 18.5 percent. In 1982, an average of 1 of every 418 registered motor vehicles was stolen statewide compared to 1 of every 357 in 1981. The 1982 motor vehicle theft rate per 10,000 registered motor vehicles was 23.9 compared to a rate of 28.0 per 10,000 in 1981, for a decrease of 14.6 percent.

MOTOR VEHICLE THEFT
CRIME RATE

	NUMBER	OFFENSES[17]	RATE PER 10,000	RATIO OF MV THEFTS
COVERED POPULATION	468,729	1,218	25.1	1 : 398
1982 REGISTERED MV'S	509,287	1,218	23.9	1 : 418

[17]In order to calculate crime rates, agencies with less than twelve months on file during 1982 were subtracted from offense and population totals. The number of offenses used in calculating the crime rate for motor vehicle theft is 1,177.

ARSON

Arson, established as a Crime Index Offense in late 1978 by congressional mandate, is defined as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

During the period, January through December, 1982, a total of 114 arsons were reported or known to the police compared to 139 arsons in 1981. An agency-by-agency comparison with the same months for the two years shows that offenses of arson were down 18.1 percent in 1982 from the number reported in 1981. The 1982 arson crime rate also showed a decrease, down from 3.0 arsons per 10,000 population in 1981 to 2.4 arsons per 10,000 in 1982. This represents a 20.0 percent decrease in the arson crime rate for 1982. Of the 114 arsons reported during 1982, 38 have been cleared for a clearance rate of 33.3 percent. This compares to 33 clearances or 23.7 percent for 1981. Estimated value of property damage during 1982 was less than half of that reported in 1981. The estimated value of property damage incidental to arson in 1982 totalled $1,332,761 compared to $2,870,950 in 1981.

INDEX OFFENSE BY CONTRIBUTOR

The tables on the following pages dipict the total Crime Index Offenses, excluding arson, by county and agency for January through December, 1982. A column displaying 1982 Index totals has been provided for agency comparison. Also presented is the percent change by county and agency where sufficient months were on file to calculate the change.

The population coverage figures are presented in order to provide the base figures used to calculate the crime rate per 10,000 inhabitants. Population figures used in preparing this report were calculated based on data provided by the U.S. Department of Commerce, Bureau of the Census, 1980 Census of Population and Housing, and the State of Wyoming, Department of Administration and Fiscal Control, Division of Research and Statistics, Wyoming Population and Employment Forecast, 5th Edition.

The crime rate per 10,000 inhabitants was not calculated for those agencies with less than twelve months on file and those agencies were excluded from the county and state rate.

If any agency should desire to recalculate any of these figures using their own county or city population figures, the formula is as follows:

$$\text{Rate} = \frac{x}{y} \times 10{,}000$$

Where: x = the number of offenses (or that for which the rate per 10,000 is desired)

y = the population base

To alter the "rate" figure, simply substitute any other number for 10,000 (i.e. 1,000, 500, 250, etc.)

STOLEN AND RECOVERED PROPERTY

Supplementary reports relating to the value of property stolen and recovered are also provided by the participating law enforcement agencies. This supplementary report requires a value to be established for property stolen and recovered for each Crime Index Offense. The determination of the value of property stolen is an obligation of the investigating officer. The following suggested procedures aid in this determination.

A. Use fair market value for items subject to depreciation.

B. Use the wholesale cost of goods stolen from retail establishments, warehouses, etc.

C. The victim's evaluation of non-depreciable items.

D. Use replacement cost or actual cash cost to victim for new or almost new items.

Additional Guidelines:

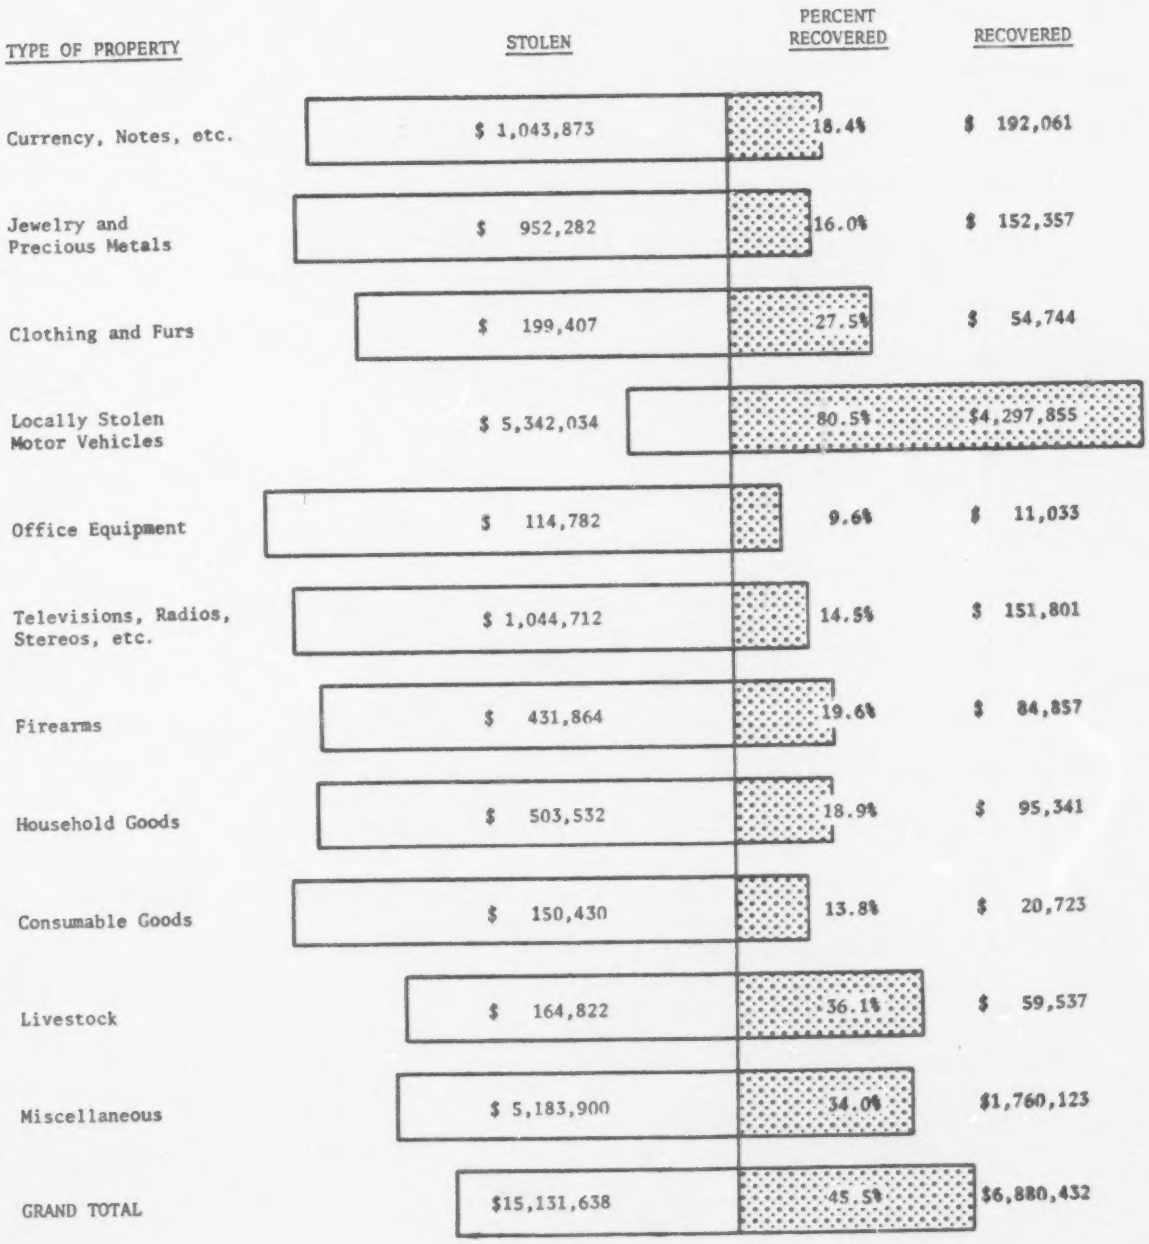
A. When recovered property is in a condition different from what it was at the time of the theft, the value at the time of recovery is used even though it is less than at the time it was stolen.

B. The value of property stolen only refers to property stolen incidental to crimes which occur in that jurisdiction and the value of property recovered includes only property originally stolen from that jurisdiction. However, it does not matter who recovers the property or where it was recovered.

The tables and charts on the following pages illustrate the data provided by these supplemental reports.

VALUE OF LOCALLY STOLEN AND RECOVERED PROPERTY

January-December, 1982



VALUE OF PROPERTY STOLEN BY OFFENSE, 1982

OFFENSE		NUMBER OF OFFENSES	VALUE OF PROPERTY

PERSONS ARRESTED

Although primarily an indication of law enforcement activity, the number of arrests provides a limited profile of the perpetrators of crime, especially for those crimes which have high clearance rates. Differences in arrest practices, policies, and enforcement emphasis among agencies influence the volume of arrests for various offenses, particularly those against public order, i.e., drunkenness, vagrancy, disorderly conduct and related violations. However, arrests for serious crimes. e.g., robbery or burglary, are more likely to be consistent and uniform throughout all jurisdictions. Procedures employed in the UCR Program require that an arrest be counted on each separate occasion an individual is taken into custody, notified or cited for committing an offense in that jurisdiction. Also, although several charges may be placed against a person at the time of arrest, only one arrest is counted each separate time he is taken into custody.

Law enforcement agencies in Wyoming effected 28,413 arrests during 1982. This figure is down 0.4 percent from the 28,529 arrests recorded in 1981. During 1982, arrests of persons under 18 years of age decreased 6.4 percent from 1981, while arrests of persons 18 years of age and over rose 0.8 percent. When only arrests for Crime Index Offenses were used to compute a trend, a 4.7 percent decrease was evidenced in the number of juvenile arrests and in the number of adult arrests. Accordingly, total arrests for Crime Index Offenses were down 4.7 percent in 1982 when compared to 1981.

Statewide, 4.4 percent of all arrests involved persons under 15 years of age, 22.0 percent were under 19 years of age, 40.1 percent were under 22, and 55.3 percent of those arrested were under age 25.

Additional analysis of figures on arrests of youthful offenders show that persons under 19 years of age comprised 38.6 percent of those arrested for Crime Index Offenses, 11.3 percent of those arrested for violent crimes, and 43.4 percent of those arrested for property crimes.

When comparing only the Crime Index Offenses (including arson), 13.4 percent of those arrested in Wyoming during 1982 were under 15 years of age, 38.6 percent were under the age of 19, and 57.2 percent were under 22 years of age.

*Percent distribution does not total 100.0 due to rounding.

Arrests of males decreased 1.1 percent from 1981 and female arrests increased 3.6 percent for all offenses. Arrests of males outnumber those of females over 5 to 1, with males accounting for 80.4 percent of the arrests for Index Crimes and 92.6 percent of those for crimes of violence. Female arrests for Index Crimes climbed 10.8 percent from 1981. Their criminal involvement continues to be related mainly to larceny, which accounted for 88.4 percent of all female Index Offense arrests.

Depicted on the tables that follow is Wyoming arrest data for 1982. The first two tables present State total summaries which are followed by Wyoming arrests by county and agency.

It should be noted here that juvenile arrests are in accordance with the age definition of a juvenile under the National Uniform Crime Reporting Program (a person under 18 years of age).

LAW ENFORCEMENT PERSONNEL

The law enforcement employee rates presented in the following tables should be viewed as guides or indicators, not as recommended or desirable police strengths. Because of the wide variations in the law enforcement responsibilities across the State, caution should be used when attempting any comparison of employee rates. Just as many factors affect the extent and type of crime from place to place, the conditions present in any given community affect the type of police service required. Adequate manpower for a specific locale can only be determined after careful study and analysis of the various conditions which contribute to the requirements for law enforcement service in that jurisdiction.

OFFENSES IN UNIFORM CRIME REPORTING

Offenses in Uniform Crime Reporting are divided into two groupings designed as Part I and Part II crimes. Information on the number of Part I Offenses known to law enforcement, the number cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Arrest data are reported for Part I and Part II offenses.

The Part I Offenses are as follows:

1. Criminal Homicide - a. Murder and Non-Negligent Manslaughter: the willful (non-negligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon, by a private citizen,while in the act of committing a felony. b. Manslaughter by Negligence: the killing of another person through gross negligence. Excludes traffic fatalities. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

2. Forcible Rape - The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory rape offenses (no force used/victim under age of consent) are excluded.

3. Robbery - The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

4. Aggravated Assault - An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury.

This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

5. Burglary-Breaking or Entering - The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

6. Larceny-Theft (except motor vehicle theft) - The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

7. Motor Vehicle Theft - The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

8. Arson - Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II Offenses are:

9. Other Assaults (simple) - Assaults or attempted assaults where no weapon was used or which did not result in serious or aggravated injury to the victim.

10. Forgery and Counterfeiting - Making, altering, uttering, or possessing, with intent to defraud, anything false which is made to appear true. Attempts are included.

11. Fraud - Fraudulent conversion and obtaining money or property by false pretenses. Included are larceny by bailee and bad checks except forgeries and counterfeiting.

12. Embezzlement - Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

13. Stolen Property; Buying, Receiving, Possessing - Buying, receiving, possessing stolen property, including attempts.

14. Vandalism - Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or person having custody or control.

15. Weapons, Carrying, Possessing, Etc. - All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

16. Prostitution and Commercialized Vice - Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring or transporting women for immoral purposes. Attempts are included.

17. Sex Offenses (Except Forcible Rape, Prostitution, or Commercialized Vice) - Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

18. Drug Abuse Violation - State and local offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing and manufacturing of narcotic drugs.

19. Gambling - Promoting, permitting or engaging in illegal gambling.

20. Offenses Against the Family and Children - Non-support, neglect, desertion, or abuse of family and children.

21. Driving Under the Influence - Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

22. Liquor Laws - State or local liquor law violations, except "drunkenness" (offense 23) and "driving under the influence" (offense 21). Federal violations are excluded.

23. Drunkenness - Drunkenness or intoxication. Excluded is "driving under the influence" (Offense 21).

24. Disorderly Conduct - Breach of the peace.

25. Vagrancy - Vagabondage, begging, loitering, etc.

26. All Other Offenses - All violations of state or local laws, except offense 1-25 and traffic offenses.

27. Suspicion - No specific offense; suspect released without formal charges being placed.

28. Curfew and Loitering Laws - Offenses relating to violation of local curfew or loitering ordinances where such laws exist.

29. Runaways - Limited to juveniles taken into protective custody under provisions of local statutes.
